

Specifications:

- Belt widths: 8" (203) to 24" (610)
- Conveyor lengths: 4' (1,219) to 25' (7,620)
- 1.62" (41) of belt take-up
- Load Capacity* up to 100 lbs.* (45 kg)
- Adjustable angle, $25^\circ - 60^\circ$.
- Belt speeds to 275 ft/min (83.8 M/min)
- Belt direction is not reversible
- Cleats available from .24" (6) to 2.36" (60) high
- 3" (76) dia. drive pulley turns approximately 9.7" (246) of belt per revolution.
- Metric fasteners

Features/Benefits:

- Rack and pinion offers single point belt tensioning
- Low Maintenance sealed bearings
- High strength anodized aluminum frame with clear coat finish
- T-Slots for easy mounting of pre-engineered accessories
- V-guided belts eliminate tracking adjustments
- Adjustable angle frames conform to applications
- Quick belt change increases uptime

Conveyor load capacity depends on conveyor size, incline, motor position, accumulated loads and other factors.
