

### Specifications:

- Belt widths: 8" (203) to 24" (610)
- Conveyor lengths: 4' (1,219) to 25' (7,620)
- 1.62" (41) of belt take-up
- Load up to 100 lbs.\* (45 kg)
- Adjustable angle, 25° - 60°
- Available with 20 mm, 30 mm, & 40 mm cleat & sidewall heights
- Belt speeds to 275 ft/min (83.8 M/min)
- Belt direction **is not** reversible
- 3" (76) dia. drive pulley turns approximately 9.7" (246) of belt per revolution
- Metric fasteners

### Features/Benefits:

- Low maintenance sealed bearings
- Rack and pinion belt design offers single point belt tensioning
- High strength anodized aluminum frame with clear coat finish
- T-Slots for easy mounting of pre-engineered accessories
- V-guided belts eliminate tracking adjustments
- Quick belt change increases uptime

\*Conveyor load capacity depends on conveyor size, incline, motor position, accumulated loads and other factors. See Performance Charts / Data section for details.

Conveyor load capacity depends on conveyor size, incline, motor position, accumulated loads and other factors.
