## Introduction

#### IMPORTANT

Some illustrations may show guards removed. DO NOT operate equipment without guards.

Upon receipt of shipment:

- Compare shipment with packing slip. Contact factory regarding discrepancies.
- Inspect packages for shipping damage. Contact carrier regarding damage.
- Accessories may be shipped loose. See accessory instructions for installation.

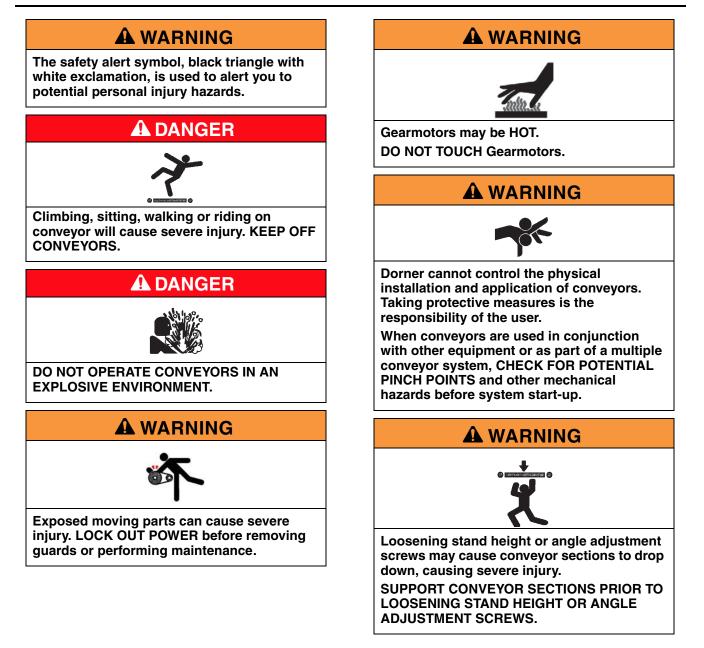

Dorner's Limited Warranty applies.

Dorner 3200 series conveyors are covered by Patent Numbers 5,156,260, 6,871,737B2, 6,910,571B1, 6,971,509B2, and corresponding patents and patent applications in other countries.

Dorner reserves the right to make changes at any time without notice or obligation.

Dorner has convenient, pre–configured kits of Key Service Parts for all conveyor products. These time saving kits are easy to order, designed for fast installation, and guarantee you will have what you need when you need it. Key Parts and Kits are marked in the Service Parts section of this manual with the Performance Parts Kits logo  $\square$ .

## Warnings – General Safety

## **Product Description**

Refer to Figure 1 for typical components.

#### **Typical Components:**

| А | Conveyor                   |
|---|----------------------------|
| В | Gearmotor Mounting Package |
| С | Gearmotor                  |
| D | Guiding & Accessories      |
| Е | Mounting Brackets          |
| F | Return Rollers             |
| G | Support Stand              |
| Н | Variable Speed Controller  |
| Ι | Drive End                  |
| J | Idler/Tension End          |
|   |                            |

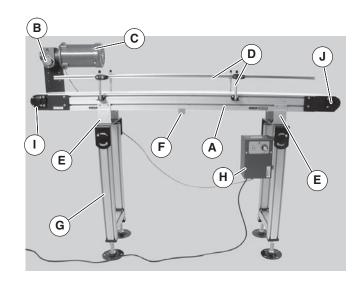

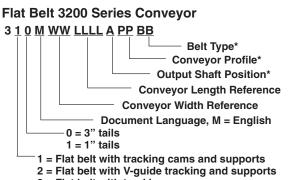

Figure 1

## **Specifications**

#### Models:

#### Flat Belt 3200 Series Conveyor

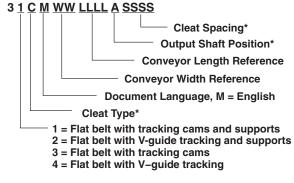

3 = Flat belt with tracking cams

#### 4 = Flat belt with V-guide tracking

#### **Cleated Belt 3200 Series Conveyor**

#### **Cleated Belt 3200 Series Conveyor**

\* See Ordering and Specifications Catalog for details.

## **Specifications**

## **Conveyor Supports:**

#### **Maximum Distances:**

K = 24" (610 mm) (Drive End) L = 12 ft (3658 mm) M = 36" (914 mm) (Idler End)

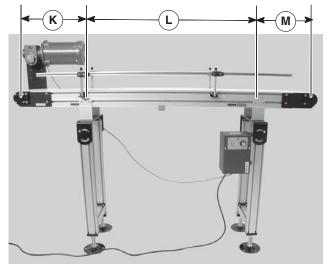

Figure 2

\* See Ordering and Specifications Catalog for details.

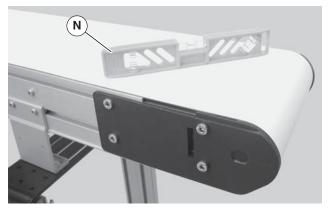

#### NOTE

- Maximum conveyor loads based on:
- Non-accumulating product
- Product moving towards gearmotor
- Conveyor being mounted horizontal

## Installation

## NOTE

Conveyor MUST be mounted straight, flat and level within confines of conveyor. Use a level (Figure 3, item N) for setup.

## **Required Tools**

- Hex-key wrenches:
- 4 mm, 5 mm
- Level
- Torque wrench

# Recommended Installation Sequence

- Install support stands (see accessory instructions)
- Assemble conveyor (if required)
- Attach mounting brackets to conveyor
- Attach conveyor to stands
- Install return rollers on conveyor (optional)
- Mount gearmotor mounting package (see accessory instructions)
- Attach guides/accessories (see page 21 through 35 of "Service Parts" section for details)

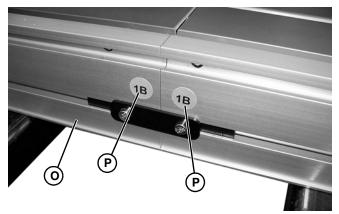

## Conveyors Up to 13 ft (3962 mm)

No assembly is required. Install mounting brackets and return rollers. Refer to "Mounting Brackets" on page 7 and "Return Rollers" on page 8.

# Conveyors Longer Than 13 ft (3962 mm)

Installation Component List:

- O Conveyor frame
- P Section Label
- 1. Locate and arrange conveyor sections by section labels (Figure 4, item P).

#### Figure 4

2. On tension end of the conveyor, identified by the pinion locking screw (Figure 5, item S), push in head plate assembly (U): Loosen the pinion locking screw (S), adjust the pinion torque screw (Figure 6, item V). On both sides of conveyor, loosen the two tail clamp bolts (Figure 5, item T), and push head plate assembly (U) inward.

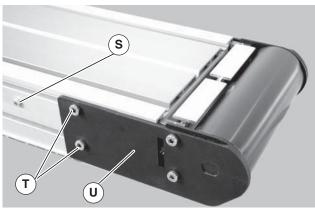

Figure 5

## Installation

Figure 6

3. Roll out conveyor belt and place conveyor frame sections (Figure 7, item O) into belt loop.

Figure 7

 Join conveyor sections and install connector brackets (Figure 8, item W) or connector/mount brackets (WA) and screws (X) on both sides as indicated. Tighten screws to 60 in-lb (7 Nm).

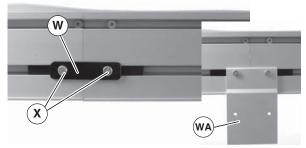

Figure 8

#### NOTE

For Conveyors longer than 20 ft (6096 mm) use the process outlined in the "Conveyor Belt Tensioning" section on page 12. Extend the Drive End Tail Assembly to the zero mark of the tension indicator (Figure 9, item AR) before proceeding to step 5. The zero mark for the tension indicator is when the indicator begins to turn black.

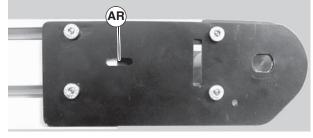

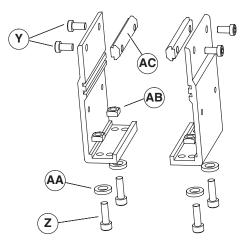

Figure 9

- 5. Tighten conveyor belt, refer to "Conveyor Belt Tensioning" on page 12.
- 6. Install mounting brackets and return rollers. Refer to "Mounting Brackets" on page 7 and "Return Roller" on page 8.

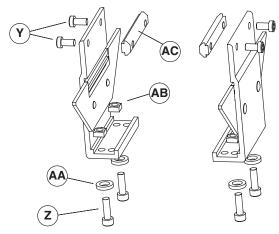

## **Mounting Brackets**

1. Locate brackets. Exploded views shown in Figure 10 & Figure 11.

Mounting Brackets for Flat Belt Conveyor

Figure 10

Mounting Brackets for Cleated Belt Conveyor

Figure 11

## Installation

- 2. Remove screws (Figure 10, item Y & Z) & (Figure 11, item Y & Z), washers (AA), nuts (AB) and T-bars (AC) from brackets.
- Insert T-bars (Figure 10, item AC) & (Figure 11, item AC) into conveyor side slots (Figure 12, item AC). Fasten brackets (Figure 12, item AD) to conveyor with mounting screws (Y).

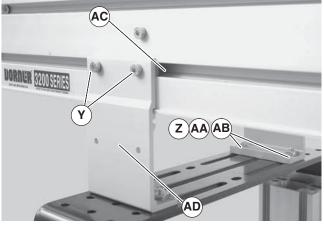

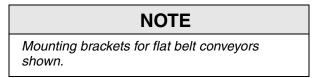

Figure 12

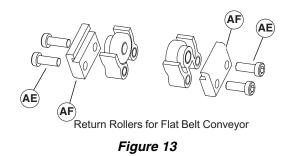

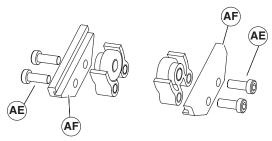

- 4. Fasten brackets to support stand with mounting screws (Figure 12, item Z), washers (AA) and nuts (AB).
- 5. Tighten screws (Figure 12, item Y & Z) to 60 in-lb (7 Nm).

## **Return Rollers**

# Cleated Belt and 4–6" (51–152 mm) Wide Flat Belt Conveyors

1. Locate return rollers. Exploded views shown in Figure 13 & Figure 14.

#### Figure 14

- 2. Remove screws (Figure 13, item AE) & (Figure 14, item AE) and clips (AF) from roller assembly.
- 3. Install roller assemblies (Figure 15, item AG) as shown. Tighten screws (AE) to 60 in-lb (7 Nm).

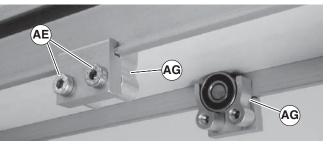

Figure 15

#### 8–48" (203–1219 mm) Wide Flat Belt Conveyors

1. Locate return rollers. Exploded view shown in Figure 16.

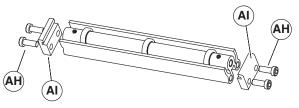

Figure 16

- 2. Remove screws (Figure 16, item AH) and clips (AI) from roller assembly.
- 3. Install roller assembly as shown (Figure 17, item AJ). Tighten screws (AH) to 60 in-lb (7 Nm).

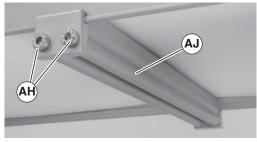

Figure 17

#### **Required Tools**

#### **Standard Tools**

- Hex-key wrenches:
  - 2.5 mm, 4 mm, 5 mm

#### Checklist

- Keep service parts on hand (see "Service Parts" section for recommendations)
- Keep supply of belt cleaner (part # 625619)
- Clean entire conveyor and knurled pulley while disassembled
- Replace worn or damaged parts

#### Lubrication

No lubrication is required. Replace bearings if worn.

## **Maintaining Conveyor Belt**

#### Troubleshooting

Inspect conveyor belt for:

- Surface cuts or wear
- Stalling or slipping
- Damage to V-guide

Surface cuts and wear indicate:

- · Sharp or heavy parts impacting belt
- · Jammed parts
- Improperly installed bottom wipers (if installed)
- Accumulated dirt in wipers (if installed)
- Foreign material inside the conveyor
- · Improperly positioned accessories
- Bolt-on guiding is pinching belt

Stalling or slipping indicates:

- Excessive load on belt
- Conveyor belt or drive timing belt are not properly tensioned
- Worn knurl or impacted dirt on drive pulley
- Intermittent jamming or drive train problems

Damage to V-guide indicates:

- Twisted or damaged conveyor frame
- Dirt impacted on pulleys
- · Excessive or improper side loading

#### Cleaning

#### IMPORTANT

Do not use belt cleaners that contain alcohol, acetone, Methyl Ethyl Ketone (MEK) or other harsh chemicals.

Use Dorner Belt Cleaner (part # 625619). Mild soap and water may also be used. Do not soak the belt.

For /05 woven polyester and /06 black anti-static belts, use a bristled brush to improve cleaning.

#### **Conveyor Belt Replacement**

injury. LOCK OUT POWER before removing guards or performing maintenance.

#### **Conveyor Belt Replacement Sequence**

- Remove old conveyor belt:
- -Conveyor without Stands or Gearmotor Mounting Package
- -Conveyor with Stands and Gearmotor Mounting Package
- Install new conveyor belt
- Tension conveyor belt

#### Belt Removal for Conveyor Without Stands or Gearmotor Mounting Package

1. If equipped, remove return rollers and guiding and accessories from one side of conveyor.

2. On tension end of the conveyor, identified by the pinion locking screw (Figure 18, item S), push in head plate assembly (U): Loosen the pinion locking screw (S), adjust the pinion torque screw (Figure 19, item V). On both sides of conveyor, loosen the two tail clamp bolts (Figure 18, item T), and push head plate assembly (U) inward.

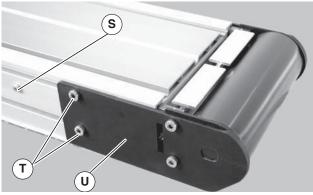

Figure 18

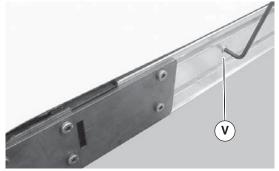

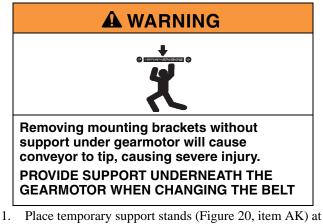

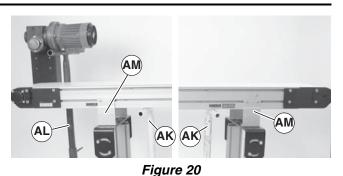

Figure 19

3. Remove conveyor belt.

# Belt Removal for Conveyor With Stands and Gearmotor Mounting Package

 Place temporary support stands (Figure 20, item AK) at both ends of the conveyor. Place an additional support stand under the drive motor (AL), if equipped. See WARNING.

 Remove mounting brackets (Figure 20, item AM) from one side of conveyor. (Reverse steps 3 & 4 of "Mounting Brackets" section on page 7).

- 3. If equipped, remove return rollers, guiding and accessories from side opposite drive cover.
- 4. On tension end of the conveyor, identified by the pinion locking screw (Figure 21, item S), push in head plate assembly (U): Loosen the pinion locking screw (S), adjust the pinion torque screw (Figure 22, item V). On both sides of conveyor, loosen the two tail clamp bolts (Figure 21, item T), and push head plate assembly (U) inward.

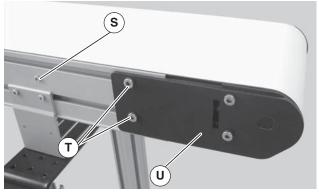

Figure 21

Figure 22

5. Remove belt (Figure 23, item AN) from conveyor.

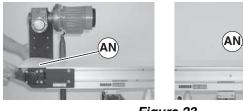

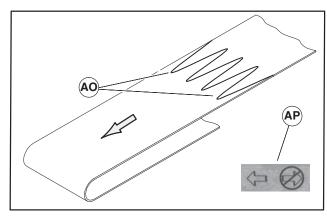

Figure 23

#### 3200 Series End Drive Flat and Cleated Belt Conveyors

# Belt Installation for Conveyor without Stands or Gearmotor Mounting Package

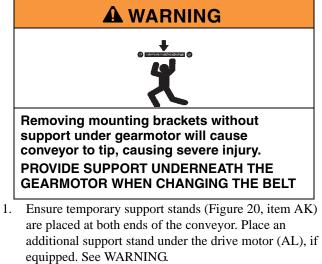

1. Orient belt so splice leading fingers (Figure 24, item AO) point in the direction of belt travel as identified by the conveyor directional label (AP).

#### Figure 24

- 2. Slide belt onto the conveyor frame assembly.
- 3. Tension belt. Refer to "Conveyor Belt Tensioning" on page 12.
- 4. If equipped, install wipers, return rollers and guiding

Belt Installation for Conveyor with Stands and Gearmotor Mounting Package

- Orient belt so splice leading fingers (Figure 24, item AO) point in the direction of belt travel as identified by the conveyor directional label (AP).
- 3. Install belt (Figure 25, item AN) on conveyor. Lift conveyor slightly to avoid pinching belt on temporary support stands.

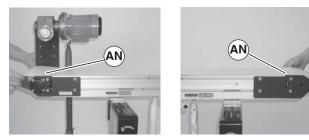

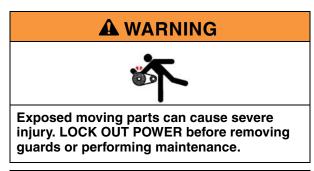

Figure 25

- 4. Re-install conveyor mounting brackets. Refer "Mounting Brackets" on page 7, steps 3 through 5.
- 5. Tension belt. Refer to "Conveyor Belt Tensioning" on page 12.
- 6. If equipped, re-install return rollers and guiding.

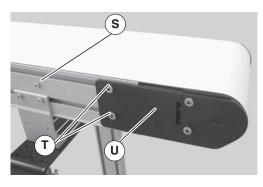

## **Conveyor Belt Tensioning**

## NOTE

For conveyors longer than 20 ft (6096 mm) the belt tensioning procedure outlined below may be preformed on both the Drive and Idler Ends of the conveyor.

1. On tension end of the conveyor, identified by the pinion locking screw (Figure 26, item S), loosen the two tail clamp bolts (T), on both sides of conveyor.

#### Figure 26

 With 5mm hex wrench, hold pinion torque screw (Figure 27, item V). Loosen the pinion locking screw (Figure 26, item S) and turn the pinion torque screw (V) to extend head plate assembly.

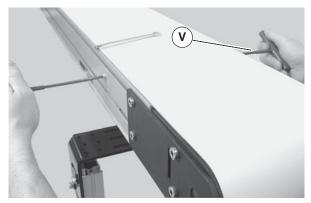

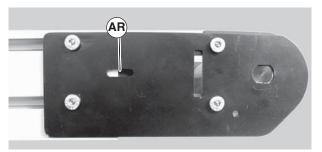

Figure 27

## NOTE

On pinion gear, do not exceed a torque of 100 in-lb (11.3 N–m). Over tensioning the conveyor belt could cause excessive pulley bearing load and early failure.

3. Extend head plate assembly until proper tension in the belt is achieved. If proper tensioning can not be obtained before the belt life indicator is all black (Figure 28, item AR) the belt must be replaced.

#### Figure 28

- 4. After adjusting proper tensioning, tighten the pinion locking screw (Figure 26, item S) to 69 in–lbs (7.8 N–m), and tighten tail clamp bolts (Figure 26, item T) on both sides of conveyor to 146 in-lb (16.5 N–m).
- 5. If belt tracking is necessary, refer to "Conveyor Belt Tracking" on page 12.

## **Conveyor Belt Tracking**

#### V-Guided Belts

V-guides on belts help maintain proper belt tracking. Track as needed to reduce belt bulge from center of belt (Figure 29). See steps below in "Non V-guided Belts" procedure for adjusting for any belt bulging. Belt bulge will be minimal when belt is properly tracked.

Figure 29

#### **Non V-Guided Belts**

Non V-guided belt conveyors are equipped with belt tracking assemblies.

When adjusting belt tracking, always adjust the discharge end of the conveyor first. To adjust belt tracking:

- Ensure tensioning racks are extended and touching the idler pulley headplates: loosen the pinion locking screw (Figure 26, item S) and rotate the pinion torque screw (Figure 27, item V) clockwise until contact with the head plate is made, then tighten the pinion locking screw (S) to 69 in–lbs (7.8 N–m)
- 2. On the side of conveyor to be adjusted, loosen two (2) tail clamp screws (Figure 30, item T).

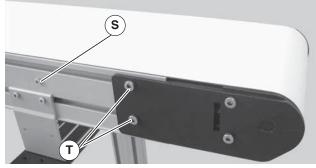

Figure 30

With the conveyor running, use wrench (Figure 31, item AS) to rotate the tracking screw (Figure 32, item AT) in small increments until the belt tracks in the center of the conveyor.

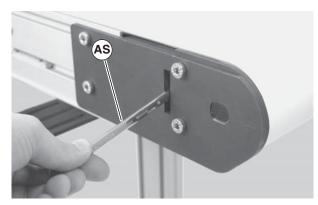

Figure 31

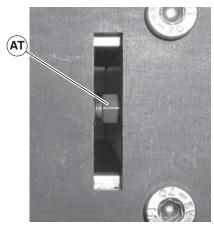

Figure 32

4. Re-tighten the head plate fastening screws (Figure 33, item T) with a 5 mm hex-key wrench to 146 in-lb (16.5 Nm).

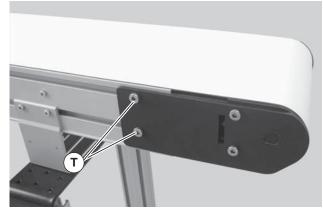

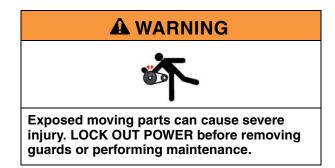

Figure 33

#### **Pulley Removal**

Remove conveyor belt to access pulley(s). See "Conveyor Belt Replacement" on page 9. Remove the desired pulley following the corresponding instructions below:

- A Idler Pulley Removal
- **B** Drive Pulley Removal
- C Transfer Tail Pulley Removal

#### A – Idler Pulley Removal

1. Temporarily support the idler pulley.

2. On one side of conveyor, loosen the two (2) back fastening screws (Figure 35, item T) and remove two (2) front fastening screws (AU).

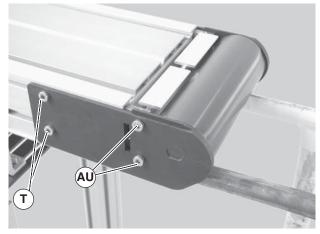

Figure 35

3. Pull back the outer headplate (Figure 36, item U) and remove the inner spacer (AV).

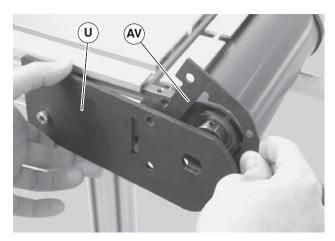

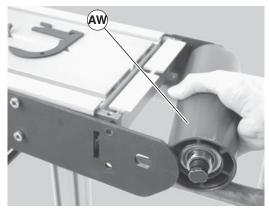

Figure 36

4. Slide the idler pulley assembly (Figure 37, item AW) out of the headplate on the opposite side.

5. Remove the pulley shaft assembly: remove the clip ring (Figure 38, item AX) and washer (AY) from one side of the pulley assembly.

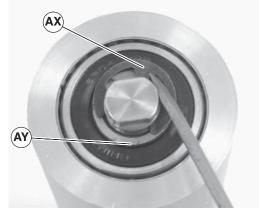

Figure 38

6. Slide the shaft assembly (Figure 39, item AZ) out of the pulley (AW).

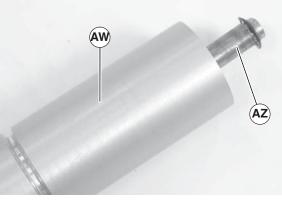

Figure 39

#### **B** – Drive Pulley Removal

- 1. Remove the gearmotor mounting package:
- Top and Bottom Mount Packages
- Side Mount Packages

#### NOTE

Bottom Mount Package shown, Top Mount Package similar.

#### **Top and Bottom Mount Packages**

a. Use a temporary support (Figure 40, item BA) to support Gearmotor.

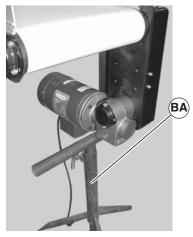

Figure 40

b. Remove four (4) screws (Figure 41, item BB) and remove cover (BC).

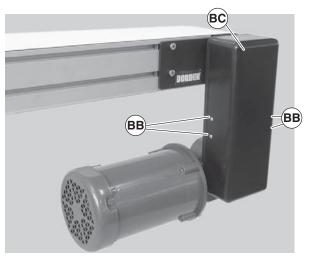

Figure 41

c. Loosen tensioner (Figure 42, item BD).

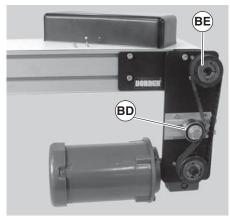

Figure 42

d. Remove taper-lock screws (Figure 43, item BF) on the driven pulley (Figure 42, item BE). Insert one (1) of taper lock screws (Figure 43, item BF) in remaining hole (BG). Tighten screw (BF) until pulley is loose. Remove pulley, taper hub assembly and timing belt.

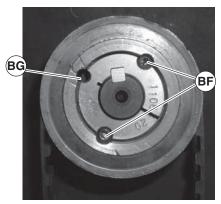

Figure 43

e. Remove four (4) M5 mounting screws (Figure 44, item BH) and two (2) M8 mounting screws (BI).

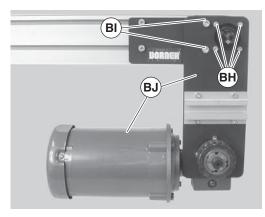

Figure 44

f. Remove gearmotor and mounting plate assembly (Figure 44, item BJ).

#### Side Mount Package

- a. Temporarily support Gearmotor.
- b. Loosen the four (4) lock screws (Figure 45, item BK).

Figure 45

c. Rotate and remove the gear motor and guard assembly (Figure 46, item BL).

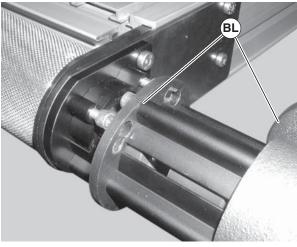

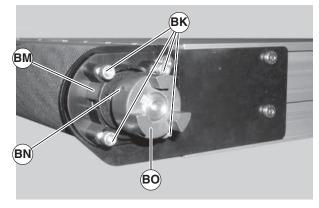

Figure 46

d. Remove the four (4) lock screws (Figure 47, item BK) and the short side drive guard (BM).

- 2. Loosen set screw (Figure 47, item BN) and remove 3– jaw coupling (BO).
- 3. Temporarily support the drive pulley.

#### Figure 48

4. Remove four shaft cover screws (Figure 49, item BP). Remove the shaft cover (BQ).

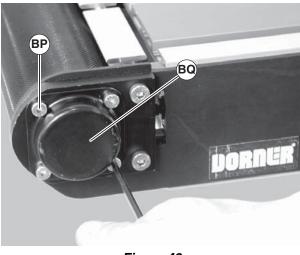

Figure 49

5. Loosen the bearing collar set screw (Figure 50, item BR) and remove bearing collar (BS). Repeat on drive shaft side of pulley (Figure 51, item BR and BS).

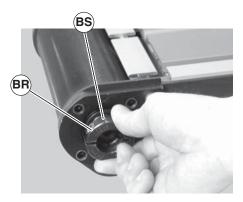

Figure 50

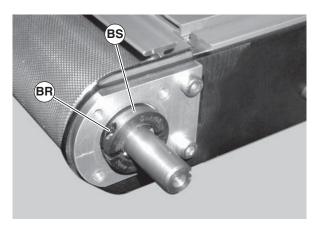

Figure 51

## NOTE

When reassembling, tighten the bearing collar set screws to 52 in-lbs (6 Nm). Check after 24 hours of conveyor use.

6. On the drive headplate, remove two (2) screws (Figure 52, item T). 60 in-lb (7 Nm)

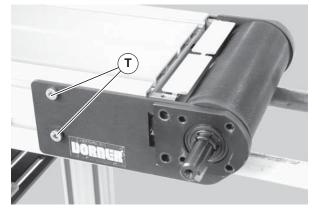

Figure 52

7. Remove the outer headplate assembly (Figure 53, item BT), and inner spacer (AV).

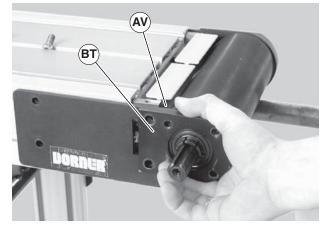

Figure 53

8. Slide the drive pulley (Figure 54, item BU) out of the headplate on the opposite side.

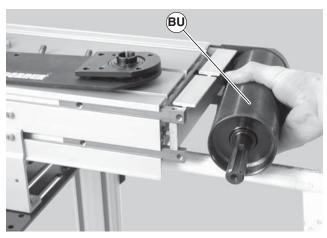

Figure 54

#### C – Transfer Tail Pulley Removal

1. Temporarily support the transfer tail assembly.

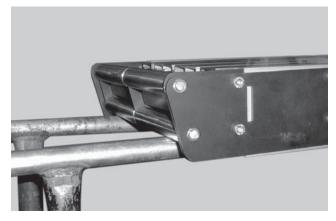

Figure 55

2. On one side of conveyor, remove the two (2) back fastening screws (Figure 56, item T), and the two (2) front fastening screws (AU)

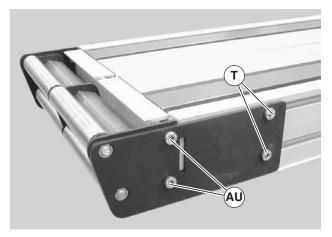

Figure 56

3. Remove the inner spacer (Figure 57, item AV).

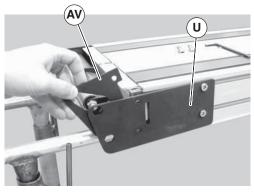

Figure 57

4. Slide the transfer tail pulley assembly (Figure 58, item BV) out of the headplate on the opposite side.

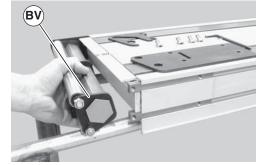

Figure 58

5. Remove hex nuts (Figure 59, item BW).

Figure 59

6. Remove support plates (Figure 60, item BX) and washers (BY).

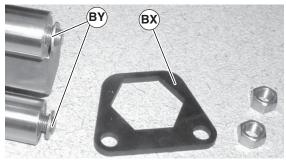

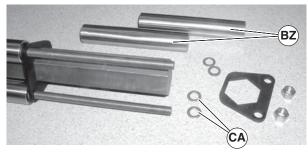

Figure 60

7. Remove pulleys (Figure 61, item BZ) and additional washers (CA).

8. To remove additional pulleys, repeat steps 6 through 7.

#### **Bearing Replacement**

- A Iulei Dearling
- **B** Drive Bearing
- C Transfer Tail Bearing

#### A – Idler Bearing Replacement

The bearings in a 3200 Series Idler Pulley can not be removed. Replace the entire pulley assembly when worn.

## **B** – Drive Bearing Removal and Replacement

#### Removal

1. Turn bearing (Figure 62, item CB) to align with slots (CC) in bearing housing. Then remove bearing.

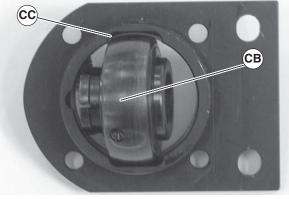

Figure 62

#### Replacement

- 1. Inspect bearing housing bearing surface. If worn or damaged, replace. See "Service Parts" on page 21.
- 2. Insert bearing (Figure 63, item CB) into housing slot (CC). Locate anti–rotation nub (CD) to align with slot (CE), and twist bearing into housing.

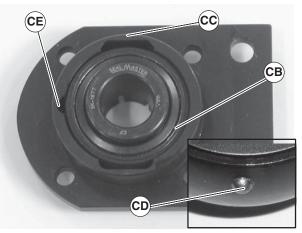

Figure 63

#### **C** – Transfer Tail Bearing Replacement

The bearings in a 3200 Series Transfer Tail Pulley can not be removed. Replace the entire pulley assembly when worn.

## **Pulley Replacement**

#### **Idler Pulley**

To replace the idler pulley, reverse the "Idler Pulley Removal" procedure on page 14.

#### **Drive Pulley**

To replace the drive pulley, reverse the "Drive Pulley Removal" procedure on page 15.

#### **Transfer Tail Pulley**

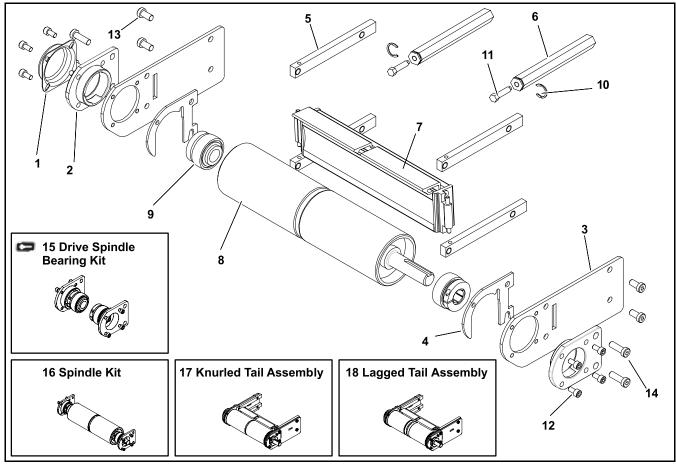

To replace the transfer tail pulley, reverse the "Transfer Tail Pulley Removal" procedure on page 18.

## Notes

#### NOTE

For replacement parts other than those shown in this section, contact an authorized Dorner Service Center or the factory. Key Service Parts and Kits are identified by the Performance Parts Kits logo 😭. Dorner recommends keeping these parts on hand.

## **Drive End Tail Assembly**

|---------------------------------|--------------------|--|--|
| # of Sections (see<br>Formulas) |                    | End Guide (for <u>LLLLL</u> See<br>Formulas) |  |
| 1                               | Each Side          | 381935– <u>LLLLL</u>                         |  |
| 2                               | Left Hand          | 381936– <u>LLLLL</u>                         |  |
|                                 | Right Hand         | 381937– <u>LLLLL</u>                         |  |
| 3 or More                       | Left Hand          | 381936– <u>LLLLL</u>                         |  |
|                                 | Middle<br>Sections | 381900– <u>LLLLL</u>                         |  |
|                                 | Right Hand         | 381937– <u>LLLLL</u>                         |  |

#### Length Formulas

| LLLLL =                  |       | veyor Length XXXX) X 12 – Tail Factor<br># of Sections of Conveyor |
|--------------------------|-------|--|
| Tail Factor =            | 00000 | for center drive with transfer tail both ends                      |
|                          | 00100 | for end drive with one transfer tail                               |
|                          | 00200 | for end drive and center drives with<br>standard tails             |
|                          | 00325 | for All Cleated Conveyors  |
| # of Conveyor Sections = |       | (Conveyor Length XXXX – 0100)                                      |
|                          |       | 1200   |
|                          |       |  |

XXXX = Conveyor Length (XX.XX ft)

#### Example

17'4" End Drive Conveyor with Standard Tails

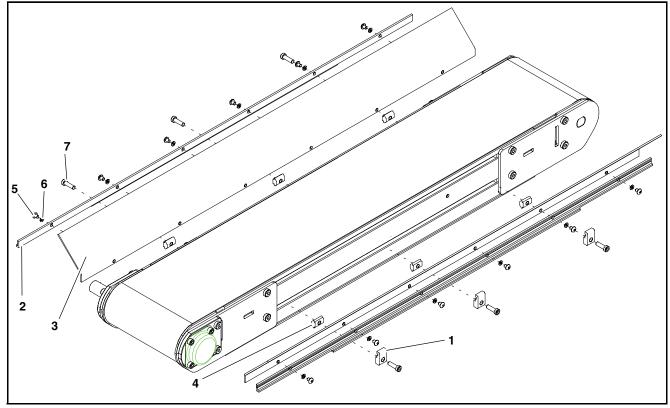

Conveyor Length = 1733 Tail Factor = 00200

# of Sections (round up)=  $\frac{(1733 - 0100)}{1200}$  = 1.36 = 2 Sections (1733 x 12) - 00200

LLLLL = 
$$\frac{(1700 \times 12)^{-00200}}{2} = 10298$$

## **Cleated Belt Return Roller**

## **Conveyor Belt Part Number Configuration**

#### Figure 65

#### Flat Belt Part Number Configuration

Refer to Dorner patent plate (Figure 65). From the model number, determine tail type ("T"), width ("WW"), length ("LLLL"), splice type ("S") and belt type ("B"). Use data to configure belt part number as indicated below. \*Add "V" for V-guided belts.

#### C 3T - WW LLLL / SBV \*

#### **Cleated Belt Part Number Configuration**

Refer to Dorner patent plate (Figure 65). From the model number determine, cleated belt ("T"), width ("WW"), length ("LLLL"), cleat type ("C"), and cleat spacing ("SSSS"). Use data to configure belt part number as indicated below. \*Add "V" for V-guided belt.

#### 3 T – <u>WW LLLL</u> C SSSS V\*

## **Return Policy**

Returns must have prior written factory authorization or they will not be accepted. Items that are returned to Dorner without authorization will not be credited nor returned to the original sender. When calling for authorization, please have the following information ready for the Dorner factory representative or your local distributor:

- 1. Name and address of customer.
- 2. Dorner part number(s) of item(s) being returned.
- 3. Reason for return.
- 4. Customer's original order number used when ordering the item(s).
- 5. Dorner or distributor invoice number (if available, part serial number).

A representative will discuss action to be taken on the returned items and provide a Returned Goods Authorization (RMA) number for reference. RMA will automatically close 30 days after being issued. To get credit, items must be new and undamaged. There will be a return charge on all items returned for credit, where Dorner was not at fault. It is the customer's responsibility to prevent damage during return shipping. Damaged or modified items will not be accepted. The customer is responsible for return freight.
