IMPORTANT
<i>Some illustrations may show guards removed. DO NOT operate equipment without guards.</i>

Upon receipt of shipment:

- Compare shipment with packing slip. Contact factory regarding discrepancies.
- Inspect packages for shipping damage. Contact carrier regarding damage.
- Accessories may be shipped loose. See accessory instructions for installation.

Dorner's Limited Warranty applies.

Dorner 6200 Series conveyors are covered by Patent Nos. 5174435, 6109427 and corresponding patents and patent applications in other countries.

Dorner reserves the right to make changes at any time without notice or obligation.

Dorner has convenient, pre-configured kits of Key Service Parts for all conveyor products. These time saving kits are easy to order, designed for fast installation, and guarantee you will have what you need when you need it. Key Parts and Kits are marked in the Service Parts section of this manual with the Performance Parts Kits logo  .

Warnings - General Safety

WARNING

The safety alert symbol, black triangle with white exclamation, is used to alert you to potential personal injury hazards.

DANGER

Climbing, sitting, walking or riding on conveyor will cause severe injury.
KEEP OFF CONVEYORS.

DANGER

DO NOT OPERATE CONVEYORS IN AN EXPLOSIVE ENVIRONMENT.

WARNING

Exposed moving parts can cause severe injury.
LOCK OUT POWER before removing guards or performing maintenance.

WARNING

Gearmotors may be **HOT**.
DO NOT TOUCH Gearmotors.

WARNING

Dorner cannot control the physical installation and application of conveyors. Taking protective measures is the responsibility of the user.

When conveyors are used in conjunction with other equipment or as part of a multiple conveyor system, **CHECK FOR POTENTIAL PINCH POINTS** and other mechanical hazards before system start-up.

WARNING

Loosening stand height or angle adjustment screws may cause conveyor sections to drop down, causing severe injury.
SUPPORT CONVEYOR SECTIONS PRIOR TO LOOSENING STAND HEIGHT OR ANGLE ADJUSTMENT SCREWS.

Product Description

Refer to Figure 1 for typical conveyor components.

A	Conveyor
B	Gearmotor
C	Belt (Cleated Belt Shown)
D	Mounting Plates
E	Stand Mounting Brackets
F	Support Stands
G	Variable Speed Controller
H	Drive End
I	Idler/Tension End

Figure 1

Specifications

Models:

Flat Belt 6200 Series Industrial Conveyor

Flat Belt 6200 Series Industrial Conveyor

* See “Ordering and Specifications” Catalog for details.

Specifications

Conveyor Supports:

Maximum Distances:

J = 18" (457 mm)**

K = 6 ft (1829 mm)***

L = 18" (457 mm)

**For Heavy Load Bottom Mount Package, mount support under gear head.

***For conveyors longer than 13 ft (3962 mm), install support at joint.

Figure 2

Specifications:

NOTE

Maximum conveyor loads based on:

- Non-accumulating product
- Product moving towards gearmotor
- Conveyor being mounted horizontal

Conveyor Width Reference (WW)	02	03	04	05	06	08	10	12	18
Conveyor Belt Width	1.75" (44 mm)	2.75" (70 mm)	3.75" (95mm)	5" (127 mm)	6" (152mm)	8" (203mm)	10" (254mm)	12" (305mm)	18" (457mm)
Maximum Conveyor Load* (See NOTE Below)	30 lb (14 kg)	35 lb (16 kg)	42 lb (19 kg)	50 lb (23 kg)	60 lb (27 kg)	70 lb (32 kg)	80 lb (36 kg)	80 lb (36 kg)	80 lb (36 kg)
Conveyor Start-up Torque*	4 in-lb (0.5 Nm)	5 in-lb (0.6 Nm)	6 in-lb (0.7 Nm)	7 in-lb (0.8 Nm)	8 in-lb (0.9 Nm)	10 in-lb (1.1 Nm)	12 in-lb (1.4 Nm)	14 in-lb (1.5 Nm)	15 in-lb (1.7 Nm)
Belt Travel	3.5" (88 mm) per revolution of pulley								
Maximum Belt Speed*	235 feet/minute (72 meters/minute)								
Belt Take-up	0.38" (10 mm) of stroke = 0.75" (19 mm) of belt take-up								

Conveyor Length Reference (LL)	02	03	04	05	06	07	08	09	10	11	12	13**	14**	15**	16**	17**	18**
Conveyor Length	2-ft (610 mm)	3-ft (914 mm)	4-ft (1219 mm)	5-ft (1524 mm)	6-ft (1829 mm)	7-ft (2134 mm)	8-ft (2438 mm)	9-ft (2743 mm)	10-ft (3048 mm)	11-ft (3353 mm)	12-ft (3658 mm)	13-ft (3962 mm)**	14-ft (4267 mm)**	15-ft (4572 mm)**	16-ft (4877 mm)**	17-ft (5182 mm)**	18-ft (5486 mm)**

* See "Ordering and Specifications" Catalog for details.

** Lengths available only in 6" (152 mm) & wider conveyors.

NOTE

Conveyor **MUST** be mounted straight, flat and level within confines of conveyor. Use a level (Figure 3, item M) for setup.

Figure 3

Required Tools

- Hex key wrenches: 4 mm, 5 mm
- 10 mm open-end wrench
- Level
- Torque wrench

Recommended Installation Sequence

- Assemble conveyor (if required)
- Attach mounting brackets to conveyor (see page 8)
- Install stands (see accessory instructions)
- Attach conveyor to stands
- Mount gearmotor mounting package (see accessory instructions)
- Attach guides/accessories (see “Service Parts” section, page 23)

Conveyors Up to 13 ft (3962 mm)

No assembly is required. Install mounting brackets and return rollers. Refer to “Mounting Brackets” on page 8 and “Return Rollers” on page 9.

Conveyors Longer Than 13 ft (3962 mm)

1. Typical components (Figure 4)

N	Conveyor frame without belt
O	M6 x 10 mm Low-Head Screws (6x) (shipped loose)
P	Connector Strips (2x) (Attached to conveyor section)
Q	Conveyor frame with belt

Figure 4

2. Compress tension end (Figure 5). Refer to steps 3 and 4 under the “Belt Removal for Conveyor Without Gearmotor Mounting Package or Stands” on page 13.

Figure 5

3. Roll out conveyor belt.
4. Place conveyor frame (Figure 6, item N) into belt loop.

Figure 6

Installation

- Join conveyor sections (Figure 7, item N and Q). Install screws (O) through frame and into connector bar (P) on both sides. Tighten screws to 60 in-lb (7 Nm).

Figure 7

- Tension conveyor belt. Refer to “Conveyor Belt Tensioning” on page 15.

Mounting Brackets

- Typical mounting bracket components (Figure 8)

R	M6 x 12 mm Socket Head Screws (4x)
S	M6 x 20 mm Socket Head Screws (4x)
T	Hard Washer (4x)
U	M6 Square Nut (4x)
V	Stand Mounting Bracket (2x)
W	Mounting Plate, Flat Belt (2x) or
X	Mounting Plate, Cleated Belt (2x)

Figure 8

- Attach clamp plate (Figure 8, item W or X) to stand mounting bracket (V) with two screws (R). Do not tighten screws.

- Attach stand mounting bracket (Figure 9, item V) to bottom of conveyor (Y). Snug-up screws (R).

Figure 9

- Repeat steps 2 and 3 for other stand mounting bracket(s).
- Position conveyor (Figure 10, item Y) on stands (Z).

Figure 10

- Attach stand mounting bracket (Figure 11, item V) to stand (Z) with two screws (S), hard washers (T) and square nuts (U). Tighten screws (S) to 80 in-lb (9 Nm).

Figure 11

- Repeat step 6 for other stand mounting bracket(s).
- Tighten all screws (R) to 80 in-lb (9 Nm).

Return Rollers

2" to 6" (44 mm to 152 mm) Wide Conveyor

NOTE

No return rollers are required on conveyor lengths up to 7 ft (2134 mm). Use one pair of rollers centered between the idler and drive spindles on 8–15 ft (2438–4572 mm) conveyors. Use two pairs of rollers at one third distances between the idler and drive spindles on 16–18 ft (4877–5486 mm) conveyors.

1. Typical return roller components (Figure 12)

AA	Return Roller Guard
AB	Return Roller Clip (Flat Belt)
AC	Low-Head Cap Screw M6–1.00 x 20mm (2)
AD	Return Roller Clip (Cleated Belt)

Figure 12

2. Loosely attach clip (Figure 13, item AB or AD) on guard (AA) with two screws (AC). Do not tighten screws.

Figure 13

3. Attach return roller assembly (Figure 14, item AE) on each side of conveyor (Y). Tighten screws (AC) to 80 in-lb (9 Nm).

Figure 14

4. On 8–18 ft (2338–5486 mm) conveyor, repeat step 3 as necessary for other return rollers.

Installation

8" to 18" (203 mm to 457 mm) Wide Flat Belt Conveyors

NOTE

No return rollers are required on conveyor lengths up to 7 ft (2134 mm). Use one roller centered between the idler and drive spindles on 8–15 ft (2438–4572 mm) conveyors. Use two rollers at one third distances between the idler and drive spindles on 16–18 ft (4877–5486 mm) conveyors.

1. Typical return roller components (Figure 15)

AF	Return Roller and Guard Assembly
AG	Return Roller Clip (2x)
AH	Low-Head Cap Screw M6–1.00 x 20mm (4x)

Figure 15

2. Loosely attach two clips (Figure 16, item AG) on roller and guard assembly (AF) with four screws (AH). Do not tighten screws.

Figure 16

3. Attach return roller assembly (Figure 17, item AI) on conveyor (Y). Tighten screws (Figure 16, item AH) to 80 in-lb (9 Nm).

Figure 17

4. On 16–18 ft (4877–5486 mm) conveyor, repeat step 3 for other return roller.

Preventive Maintenance and Adjustment

Required Tools

Standard Tools

- Hex key wrenches:
2 mm, 2.5 mm, 3 mm, 4 mm, 5 mm and 6 mm
- Manual grease gun
- Adjustable wrench
- Arbor press

Special Tools

- 450281 Sealed Bearing Removal Tool
- 450282 Sealed Bearing Installation Tool
- 2500M Tool Kit for Gang Drive Bearings

Checklist

- Keep service parts on hand (see “Service Parts” section for recommendations)
- Keep supply of belt cleaner (part # 625619)
- For optional gang-driven conveyors, keep supply of bearing grease [for 14 oz (397 gram) cartridge (part # 829-002) or for 14 oz (397 gram) can (part # 829-003)]
- Clean entire conveyor and knurled pulley while disassembled
- Replace worn or damaged parts

Lubrication

Conveyor with Standard 0.47" (12 mm) Diameter Output Shaft

No lubrication is required. Replace bearings if worn.

Conveyor with Optional Gang Drive Pulley

⚠ WARNING

Exposed moving parts can cause severe injury.

LOCK OUT POWER before removing guards or performing maintenance.

NOTE

Only drive pulley bearings require lubrication (refer to the following steps). For all other bearings, replace if worn.

1. Disassemble support (Figure 18, item AJ) and remove hex shaft and shaft guard sections (AK).

Figure 18

NOTE

Optional permanent grease fittings (part # 200398M) may be installed.

2. Install Dorner greasing adapter (part # 200046M) (Figure 19, item AL). Make sure the adapter shoulder is seated against the conveyor tail plate.

Figure 19

3. Use Dorner red grease, 14 oz (397 gram) cartridge (part #829-002) or 14 oz (397 gram) can (part # 829-003). Lubricate pulley bearing every 750 hours or more frequently, depending on operating conditions.

Preventive Maintenance and Adjustment

NOTE

Lubricate pulley bearing every 750 hours or more frequently, depending on operating conditions. When lubricating pulley bearings, use a conventional hand grease gun with a maximum of one pump per application. Do not over-lubricate. Do not use a power grease gun.

4. Grease bearing with one (1) pump from a manual grease gun. Do not over-lubricate.
5. Remove grease adapter and install on opposite side of pulley. Repeat steps 2 and 4.
6. Re-assemble hex shaft with guards and support (Figure 18, item T).

Return Rollers

No lubrication is required. Replace bearings if worn.

Maintaining Conveyor Belt

Troubleshooting

Inspect conveyor belt for:

- Surface cuts or wear
- Stalling or slipping
- Damage to V-guide

Surface cuts and wear indicate:

- Sharp or heavy parts impacting belt
- Jammed parts
- Improperly installed bottom wiper(s)
- Accumulated dirt in wiper(s)
- Foreign material inside the conveyor
- Improperly positioned accessories
- Bolt-on guiding is pinching belt

Stalling or slipping indicates:

- Excessive load on belt
- Conveyor belt or drive timing belt are not properly tensioned
- Worn knurl or impacted dirt on drive pulley
- Intermittent jamming or drive train problems

Damage to V-guide indicates:

- Twisted or damaged conveyor frame
- Dirt impacted on pulleys
- Excessive or improper side loading

Cleaning

IMPORTANT

Do not use belt cleaners that contain alcohol, acetone, Methyl Ethyl Ketone (MEK) or other harsh chemicals.

Use Dorner Belt Cleaner (part # 625619). Mild soap and water may also be used. Do not soak the belt.

For /05 woven polyester and /06 black anti-static belts, use a bristled brush to improve cleaning.

Conveyor Belt Replacement

⚠ WARNING

Exposed moving parts can cause severe injury.

LOCK OUT POWER before removing guards or performing maintenance.

Conveyor Belt Replacement Sequence (see Table of Contents for page number)

- Remove old conveyor belt
 - Conveyor without Gearmotor Mounting Package or Stands
 - Conveyor with Stands and/or Gearmotor Mounting Package
 - Conveyor with Optional Gang Drive Pulley
- Install new conveyor belt
- Tension conveyor belt

Preventive Maintenance and Adjustment

Belt Removal for Conveyor Without Gearmotor Mounting Package or Stands

1. If installed, remove and retain bottom wiper(s) (Figure 20, item AM).

Figure 20

2. If conveyor is equipped with guiding and accessories or return rollers, remove them as necessary.
3. On tension end of the conveyor identified with a label (Figure 21, item AN) and (Figure 22, item AN), loosen four M6 socket head cap screws (AO).

Figure 21

4. Retract idler spindle assembly (Figure 22, item AP) by pushing in on it or by turning M6 pinion screw (Figure 22, item AQ) and (Figure 23, item AQ) clockwise.

Figure 22

5. Remove conveyor belt (Figure 23, item AR).

Figure 23

Belt Removal for Conveyor With Stands and/or Gearmotor Mounting Package

NOTE

For conveyor with a Heavy Load Bottom or Top Mount Package, bracket (Figure 24, item AT) must be removed.

- Remove two M6x16 mm socket head screws (AS).
- Remove two M6x12 mm socket head screws (AU).
- Remove bracket (AT).

Figure 24

1. If installed, remove and retain bottom wiper(s) (Figure 20, item AM).
2. If conveyor is equipped with guiding and accessories or return rollers, remove them as necessary.
3. On tension end of the conveyor identified with a label (Figure 21, item AN) and (Figure 22, item AN), loosen four M6 socket head cap screws (AO).
4. Retract idler spindle assembly (Figure 22, item AP) by pushing it in or by turning M6 pinion screw (Figure 22, item AQ) and (Figure 23, item AQ) clockwise.

Preventive Maintenance and Adjustment

⚠ WARNING

The weight of the gearmotor is all on one end of the conveyor which could cause it to tip off the stands when the mounting clamp plates are loosened. Be sure to provide support (Figure 25, item AV) underneath the gearmotor while changing the belt.

5. Place a temporary support (Figure 25, item AV) under gearmotor mounting package.

Figure 25

6. Loosen two mounting plate screws (Figure 25, item R). Remove two screws (S), hard washers (T) and square nuts (U). Slide stand mounting bracket (V) off stand (Z) and remove from conveyor (Y).
7. Repeat step 6 for remaining stand mounting brackets on same side of conveyor.

8. Remove conveyor belt (Figure 26, item AR).

Figure 26

9. If a new belt will not be installed immediately, secure conveyor with mounting plate(s) and stand mounting bracket(s) (Figure 25, item V).

Belt Removal for Conveyor With Optional Gang Drive Pulley

1. Disassemble support (Figure 18, item AJ) and remove the hex shaft and shaft guard sections (AK).
2. If installed, remove and retain bottom wiper(s) (Figure 20, item AM).
3. If conveyor is equipped with guiding and accessories or return rollers, remove them as necessary.
4. On tension end of the conveyor identified with a  label (Figure 21, item AN) and (Figure 22, item AN), loosen four M6 socket head cap screws (AO).
5. Retract idler spindle assembly (Figure 22, item AP) by pushing it in or by turning M6 pinion screw (Figure 22, item AQ) and (Figure 23, item AQ) clockwise.
6. Remove conveyor belt (Figure 23, item AR).

Belt Installation for Conveyor without Gearmotor Mounting Package or Stands

IMPORTANT

On a flat belt conveyor, the wiper is installed on discharge end. Belt travel direction is identified by an arrow decal on the side of the conveyor (Figure 27, item AW). With a reversing gearmotor, a second bottom wiper must be installed on opposite end.

Figure 27

Preventive Maintenance and Adjustment

1. Orient the conveyor belt so that the splice leading fingers (Figure 28, item AX) point in the direction of belt travel (AY) as identified by the label (Figure 27, item AW).

Figure 28

2. Slide belt (Figure 23, item AR) onto the conveyor frame assembly.
3. On a flat belt conveyor, install bottom wiper(s) (Figure 20, item AM). Center set screws in frame and tighten to 33 in-lb (3.7 Nm).
4. Tension belt. Refer to “Conveyor Belt Tensioning” on page 15.
5. Where applicable, install return rollers, guiding and accessories.

Belt Installation for Conveyor with Gearmotor Mounting Package and/or Stands

1. Orient conveyor belt so that the splice leading fingers (Figure 28, item AX) point in the direction of belt travel (AY) as identified by the label (Figure 27, item AW).
2. Slide belt (Figure 23, item AR) onto conveyor frame assembly.
3. Install stand mounting bracket (Figure 25, item V) onto stand (Z) and conveyor (Y). Refer to “Mounting Brackets” on page 8.
4. Repeat step 3 for remaining stand mounting brackets on same side of conveyor.
5. If removed, install bottom wiper(s) (Figure 20, item W). Center set screws in frame and tighten to 33 in-lb (3.7 Nm).
6. For a conveyor with a Heavy Load Bottom or Top Mounting package, re-install bracket (Figure 24, item AT).
7. Tension belt. Refer to “Conveyor Belt Tensioning” on page 15.
8. Where applicable, install return rollers, guiding and accessories.

Belt Installation for Conveyor With Optional Gang Drive Pulley

1. Orient the conveyor belt so that the splice leading fingers (Figure 28, item AX) point in the direction of belt travel (AY) as identified by the label (Figure 27, item AW).
2. Slide belt (Figure 23, item AR) onto the conveyor frame assembly.
3. If removed, install bottom wiper(s) (Figure 20, item W). Center set screws in frame and tighten to 33 in-lb (3.7 Nm).
4. Tension belt. Refer to “Conveyor Belt Tensioning” on page 15.
5. Where applicable, install return rollers, guiding and accessories.
6. Re-assemble hex shaft with guards sections (Figure 18, item AK). Re-assemble support (AJ).

Conveyor Belt Tensioning

⚠ WARNING

Exposed moving parts can cause severe injury.

LOCK OUT POWER before removing guards or performing maintenance.

1. On tension end of the conveyor identified with a  label (Figure 21, item AN) and (Figure 22, item AN), loosen four M6 low head screws (AO).

NOTE

The M6 low head screw (Figure 29, item AZ), which is used for extending the idler spindle assembly to tension the belt, has a yellow colored head.

Do not exceed a torque of 25 in-lb (2.8 Nm) for 2" to 12" (44 mm to 305 mm) wide conveyors or 40 in-lb (4.5 Nm) for an 18" (457 mm) wide conveyor on this screw. Over-tensioning the conveyor belt could cause excessive pulley bearing load and early failure.

2. Idler spindle assembly
 - a. For an existing belt, extend idler spindle assembly (Figure 29, item AP) by turning M6 low head screw (AZ) clockwise to sufficiently tension belt to handle conveyor load.
 - b. For a new belt, extend idler spindle assembly

Preventive Maintenance and Adjustment

(Figure 29, item AP) 1" (25 mm) (BA) by turning M6 low head screw (AZ) clockwise.

Figure 29

3. Tighten four M6 low head screws (Figure 21, item AO), (Figure 22, item AO) and (Figure 29, item AO) to 40 in-lb (4.5 Nm) to secure idler spindle assembly (AP).

NOTE

If the maximum take-up stroke is achieved, replace the conveyor belt.

Pulley Removal

⚠ WARNING

Exposed moving parts can cause severe injury.

LOCK OUT POWER before removing guards or performing maintenance.

Remove conveyor belt to access pulley(s). See "Conveyor Belt Replacement" on page 12. Remove the desired pulley following instructions:

- A – Drive Pulley with Standard 0.47" (12 mm) Diameter Output Shaft
- B – Idler Pulley
- C – Gang Drive Pulley

A – Removal of Drive Pulley with Standard 0.47" (12 mm) Diameter Output Shaft

⚠ WARNING

**Drive shaft keyway may be sharp.
HANDLE WITH CARE.**

1. Remove the gearmotor mounting package. See accessory instructions.
2. For 10" (254 mm), 12" (305 mm) or 18" (457 mm) wide conveyors, remove key (Figure 30, item BB) and two M5 low head screws (BC) to remove outboard bearing (BD).

Figure 30

NOTE

Two screws (Figure 30, item BF) were removed in step 1.

3. Remove screw (BE) on drive shaft side of conveyor.
4. Remove three (3) screws (Figure 31, item BG) on side opposite of drive shaft.
5. Remove drive spindle assembly (BH).

Figure 31

Preventive Maintenance and Adjustment

6. Remove screw (Figure 32, item BI).
7. Remove headplate (BJ).
8. Remove pulley (BK).

Figure 32

B – Idler Pulley Removal

1. Remove two screws (Figure 33, item AO) on each side of conveyor.

Figure 33

2. Loosen two screws (Figure 34, item AQ and AZ).

Figure 34

3. Remove two screws (Figure 35, item AQ and AZ) and sleeves (BL) from conveyor (Y) and hex pinion (BM).

Figure 35

4. Remove two pinion ends (Figure 36, item BN), clamp blocks (BO), hex pinion (BM) and tail assembly (BP) from conveyor (Y).

Figure 36

NOTE

Note which side of conveyor magnet (Figure 37, item BQ) is located.

5. Locate magnet (Figure 37, item BQ) on spindle and bearing assembly (BR).

Figure 37

6. Remove screw (BS), headplate (BT), and spindle and bearing assembly (BR).

Preventive Maintenance and Adjustment

C – Gang Drive Pulley Removal

* - Parts required from Tool Kit, part number 2500M.

1. Remove two M5 low head screws (Figure 38, item BU) and clip (BV) from head plate (BW).

Figure 38

2. Repeat step 1 for opposite side.
3. Install bolt (part # 906-278*) (Figure 39, item BY) into retaining sleeve (BX). Pull out on bolt to remove retaining sleeve.

Figure 39

4. Repeat step 3 for opposite side.

NOTE

If retaining sleeve(s) (Figure 38, item BX) and (Figure 39, item BX) does not slide out::

- Remove tail assembly following steps 3, 4 and 5 of Removal of Drive Pulley with Standard 0.47" (12 mm) Diameter Output Shaft on page 16
- Assemble removal tool (part # 25-09*) (Figure 40, item BZ) and bolt (part # 906-278*) (BY) on spindle (CA), as shown
- Tighten bolt (BY) to remove bearing sleeve (Figure 38, item BX) and (Figure 39, item BX) from spindle (Figure 40, item CA).

Figure 40

Bearing Replacement for Drive Pulley with Standard 0.47" (12 mm) Diameter Output Shaft or Idler Pulley

IMPORTANT

Once removed, do not re-use bearings.

Bearing Removal

1. Place bearing removal tool (part # 450281) (Figure 41, item CC) over bearing (CD) with lip (CE) located in gap (CF) between bearing and spindle (CB) as shown.

Figure 41

2. Using 3/16" hex key wrench (Figure 42, item CG), tighten bearing removal tool.

Figure 42

Preventive Maintenance and Adjustment

- Using a puller (Figure 43, item CH), remove and discard bearing(s).

Figure 43

- Place open end of shaft (Figure 46, item CL) into sleeve.

Figure 46

Bearing Installation

IMPORTANT

Install bearings one at a time.

- Inspect seating surface(s) for damage. Replace if damaged.
- Slide bearing (part # 802-121) (Figure 44, item CI) onto pulley shaft.

Figure 44

- Slide the sleeve of tool (part # 450282) (Figure 45, item CK) over bearing.

Figure 45

- Using arbor press or similar device, press bearing onto pulley shaft (Figure 47).

Figure 47

- Repeat steps 1 through 5 for each bearing.

Preventive Maintenance and Adjustment

Bearing Replacement for Gang Drive Pulley

* - Parts required from Tool Kit, part number 2500M.

IMPORTANT

Once removed, do not re-use bearings.

Bearing Removal

NOTE

The bearings of a 2" (51 mm) wide gang drive pulley cannot be replaced. Order pulley assembly (part # 454702).

1. Insert bearing removal tool (part # 25-05*) (Figure 48, item CN) into the pulley (CQ) until shoulder (CM) seats against bottom of bearing (CR).

Figure 48

2. While holding bearing removal tool (CN) in position, insert extension tool (part # 25-08*) (CO) into opposite end of pulley (CQ). Rotate bearing removal tool (CN) to engage hex tip of extension tool (CO) into screw (CP).
3. While maintaining extension tool (CO) position, use a wrench to rotate bearing removal tool (CN) to expand flare.

Figure 49

4. Orient bearing anvil/sleeve removal tool (part # 25-09*) (Figure 50, item CS) with cavity facing up and place pulley onto tool.

Figure 50

NOTE

If a severely worn bearing breaks apart during removal, pulley must be replaced.

5. Press bearing out of pulley.

Figure 51

Preventive Maintenance and Adjustment

Bearing Installation

1. Orient bearing anvil/sleeve removal tool (part # 25-09*) (Figure 52, item CS) with cavity facing up and place pulley (CQ) onto tool.

Figure 52

2. Install bearing insertion tool (part # 25-10*) (Figure 53, item CT) into arbor press or similar device.

Figure 53

3. Place and hold bearing (part # 21-33) (CR) onto tool (CT).

Figure 54

IMPORTANT

Bearing and pulley alignment is critical.

4. Press bearing (Figure 55, item CR) into pulley (CQ) until seated.

Figure 55

Preventive Maintenance and Adjustment

Pulley Replacement

Drive Pulley with Standard 0.47" (12 mm) Diameter Output Shaft Replacement

1. Reverse the removal procedure "A" (see page 16).

Idler Pulley Replacement

IMPORTANT

On a tension tail assembly, orient both pinion ends (Figure 56, item BN) so they engage the same tooth positions on their respective racks.

Figure 56

1. Reverse the removal procedure "B" (see page 17).

Gang Drive Pulley Replacement

IMPORTANT

When installing clips (Figure 57, item BV), ensure step (CU) is toward head plate (BW).

Figure 57

1. Reverse the removal procedure "C" (see page 18).

NOTE

For replacement parts other than those shown in this section, contact an authorized Dorner Service Center or the factory. Key Service Parts and Kits are identified by the Performance Parts Kits logo . Dorner recommends keeping these parts on hand.

Drive End Components

Item	Part Number	Description
1	456021	Head Plate LH 2-3" (51-76mm) Wide
	456022	Head Plate LH 4-18" (102-457mm) Wide
2	807-1022	Low-Head Pilot Screw M5-.8x12mm
3	62BK4	Ball Bearing 12mm Bore x 21mm OD (x4)
4	980422M	Square Key 4mm x 22mm
5	4531 WW	Drive Spindle
6	456025	Head Plate RH 2-3" (51-76mm) Wide

Configuring Conveyor Belt Part Number

Figure 58

Flat Belt

Refer to your serial and model number plate (Figure 58). From the model number, determine conveyor width (WW), length (LLLL), and belt type (BB). Use data to configure belt part number as indicated below.

6D-WWLLLL/BBV

62-_____ / ____ V

(Fill In)

Cleated Belt

Refer to your serial and model number plate (Figure 58). From the model number, determine conveyor type (D), width (WW), length (LLLL), belt cleat type (B) and cleat spacing (SSSS). Use data to configure belt part number as indicated below.

6D-WWLLLLBSSSSV

6-_____ V

(Fill In)

Return Policy

Returns must have prior written factory authorization or they will not be accepted. Items that are returned to Dorner without authorization will not be credited nor returned to the original sender. When calling for authorization, please have the following information ready for the Dorner factory representative or your local distributor:

1. Name and address of customer.
2. Dorner part number(s) of item(s) being returned.
3. Reason for return.
4. Customer's original order number used when ordering the item(s).
5. Dorner or distributor invoice number (if available, part serial number).

A representative will discuss action to be taken on the returned items and provide a Returned Goods Authorization (RMA) number for reference. RMA will automatically close 30 days after being issued. To get credit, items must be new and undamaged. There will be a return charge on all items returned for credit, where Dorner was not at fault. It is the customer's responsibility to prevent damage during return shipping. Damaged or modified items will not be accepted. The customer is responsible for return freight.

Conveyors and conveyor accessories

Standard catalog conveyors	30%
MPB, 7200, 7300 Series, cleated and specialty belt	50%
AquaGard & AquaPruf Series conveyors	non-returnable items
Engineered to order products	case by case
Drives and accessories	30%
Sanitary stand supports	non-returnable items

Parts

Standard stock parts	30%
Plastic chain, cleated and specialty belts	non-returnable items

Returns will not be accepted after 60 days from original invoice date. The return charge covers inspection, cleaning, disassembly, disposal and reissuing of components to inventory. If a replacement is needed prior to evaluation of returned item, a purchase order must be issued. Credit (if any) is issued only after return and evaluation is complete.

Dorner has representatives throughout the world. Contact Dorner for the name of your local representative. Our Customer Service Team will gladly help with your questions on Dorner products.

For a copy of Dorner's Warranty, contact factory, distributor, service center or visit our website at www.dorner.com.

For replacement parts, contact an authorized Dorner Service Center or the factory.
