

Dorner | UR+ Solutions

Benefits Guide

Program Overview & Benefits

1 For customers with existing cobots, or those thinking about purchasing cobots, the URcap makes the integration more seamless & easier to configure and control.

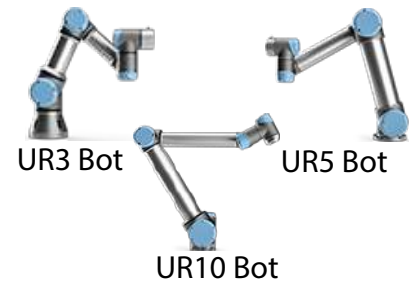

- 74 bots per 10,000 employees is the world's average robot density
- The industrial robot market is expected to grow by over 175% within the next decade

2 The Dorner URcap has been designed for both CB series and e-Series controllers.

- Full compatibility with with UR3, UR5, UR10, and e-Series Universal Robot controllers

3 Easy & Efficient set-up & configuration.

- Easy software download, quick set-up times, and user-friendly interface make this a very accessible and easy to control system

4 Integration with the widest variety of applications.

- Ideal choice for automation, assembly, packaging & palletizing applications

5 Ability to program cobots first task & integrate with conveyors in only a few hours

- Download software, plug in to Universal Controller & follow set-up instructions

6 Flexible deployment & ability to be reconfigured and used with multiple applications.

- Dorner URcap plug-in can be reconfigured for multiple applications using the Universal Controller for advanced functionality

* This is NOT an exclusive partnership between Dorner & Universal Robots, we are only part of the UR+ Solutions program.
