ENGINEERING MANUAL

FDA Approved Materials & Components Fast, Simple to Use Online Configurator

Rapid Deliveries

BISSC Certified Conveyors

CONVEYORS

Stainless Steel Conveyors for Dry, Wipe Down and Wet Applications

Sleek, Low Profile Design

- · Quick, five-minute belt change for increased uptime
- Bolt slider mechanism for fast, single point belt tensioning
- V-Groove frame with V-Guided belt ensures accurate tracking
- Streamlined design fits where other conveyors do not
- Low profile, robust welded frame design, for easy cleaning
- Small 32mm (1.25 in) diameter end rollers for transfer of small products

Innovative and Durable

- 304 Stainless Steel welded frame with minimal horizontal surfaces
- Designed for wipe down and low pressure wash-down with non-caustic chemicals
- Tip-up tails for access inside the conveyor for cleaning and maintenance
- Compact and enclosed tensioning system providing smooth and snag-free cleaning
- Carriage bolt on guiding for easy set up

High Side Guide Block with Carriage Bolt

Engineered Solutions

- Dorner's Engineered Solutions Group can tailor fit AquaGard Conveyors for specific applications and product handling requirements
- With a custom-designed conveyor system in place and the help of highly specialized engineering, your products are processed faster, your services are delivered quicker, and your profits are increased
- Solutions include: chicaning, retracting tails, depositing and rejects, merging, product flow, and more!

The Benefits of Dorner AquaGard Conveyors

Industry Ready

- Designed and manufactured to food equipment standards
- · BISSC certified conveyors
- FDA approved materials and components
- · Washdown rated gearmotors and controls

A Focus on Speed

- · Dorner sets the industry standard for rapid delivery
- Sanitary conveyors ship in as little as 10 business days
- Fast and effective design reduces cleaning preparation time

FOR APPLICATION FLEXIBILITY

Specifications

- Loads up to 22.7 kg (50 lbs)*
- Belt speeds up to 75 m/min (246 ft/min)
- Belt widths: 70 mm (2.75 in) to 457 mm (18 in)
- Conveyor lengths: 500 mm (19.7 in) to 5485 mm (18 ft)
- One revolution of drive pulley moves the belt approximately 107 mm (4.2 in)
- · Robust welded 304 Stainless Steel Frame
- Stainless steel bearing with FDA H2 food grade grease
- · FDA approved belting and plastic components
- · Minimal horizontal surfaces
- · Suitable for use in wet environments
- Stainless Steel construction for wipe down and low pressure washdown with non-caustic solutions
- · V-guide belt tracking
- · Variety of guiding options

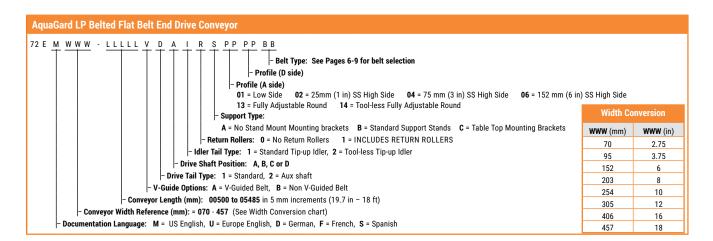

STANDARD FEATURE: V-Guided Belt Tracking

STANDARD FEATURE: Tip-Up Tail**

OPTIONAL:
Tool-less Fully Adjustable Round

^{*} Conveyor load capacity depends on conveyor size, incline, motor position, accumulated loads and other factors.

Order gearmotor mounting packages and gearmotors separately, see pages 15-20. For support stands and accessories, see page 22-24.

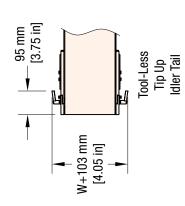

^{**} Note: Do not run the conveyor with the tail in the tip-up position.

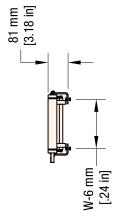

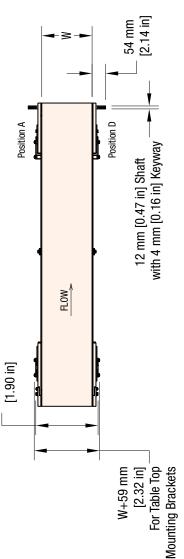

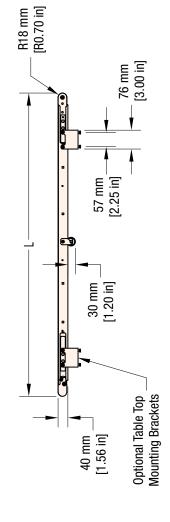

Since belts are being pulled, positions A & D are preferred. Pushing belts (B & C) reduces conveyor load capacity by approximately 66%.

W = Conveyor Belt Width Dim = mm (in)

STANDARD SIZES								
Conveyor Width Reference	070	095	152	203	254	305	406	457
1 1 1	70	95	152	203	254	305	406	457

Specifications

- · Loads up to 22.7 kg (50 lbs)*
- Belt speeds up to 75 m/min (246 ft/min)
- Belt widths: 70 mm (2.75 in) to 457 mm (18 in)
- Conveyor lengths: 500 mm (19.7 in) to 5485 mm (18 ft)
- Cleat heights from 11 mm (0.43 in) to 67 mm (2.63 in)
- · Robust welded 304 Stainless Steel Frame
- Stainless steel bearing with FDA H2 food grade grease
- · FDA approved belting and plastic components
- · Cleated belt options include sealed edge and encased
- · Minimal horizontal surfaces
- · Suitable for use in wet environments
- Stainless Steel construction for wipe down and low pressure washdown with non-caustic solutions
- · Rugged Stainless Steel guiding

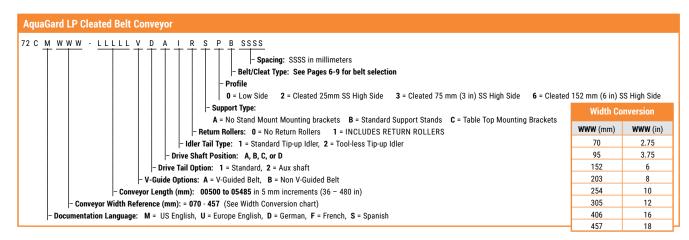

STANDARD FEATURE: V-Guided Belt Tracking

STANDARD FEATURE: Tip-Up Tail**

OPTIONAL: High Side Guides Up to 76 mm (3 in) Tall

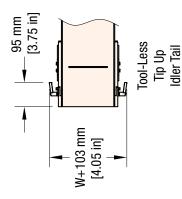

^{*} Conveyor load capacity depends on conveyor size, incline, motor position, accumulated loads and other factors.

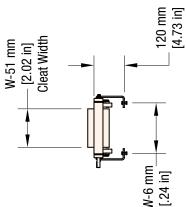

Order gearmotor mounting packages and gearmotors separately, see pages 15-20. For support stands and accessories, see page 22-24.

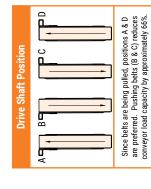

^{**} Note: Do not run the conveyor with the tail in the tip-up position.

Dim = mm (in)

Note: See below for splice details. Plastic Clipper splice requires longer lead times. Clipper splice not available on Z-Frame Series Conveyors.

Note: Belts with V-Guiding may have a slight high spot or rib on the top surface. This rib would run longitudinally along the center of the belt. Consult factory with applications for which this may cause interference.

Note: Wet applications are limited to specialty belt types 54, 55, 68, 69 and 70 only (see next page).

BELT SPLICING

Finger Splice

All belts are available with a standard Thermoformed finger splice. This splice makes the belt continuous and is virtually undetectable. Splice bonding methods vary by belt type. Consult factory for details.

Plastic Clipper**

An optional plastic clipper splice is available for quick removal of belts or when conveyors are installed in tight spaces.

Metal Clipper**

An optional metal clipper splice is also available for quick removal of belts or when conveyors are installed in tight spaces.

^{*}Incline varies due to factors like dust, fluids and part material.

^{**} Plastic and Metal Clippers are slightly thicker than base belt. Contact factory for details.

Note: Wet applications are limited to specialty belt types 54, 55, 68 and 69 only.

CLEATED BELT SPACING

- Cleat spacing is determined by conveyor length and desired number of cleats
- Minimum spacing = 50 mm (2 in)
- Spacing accuracy = ±2 mm (.08 in)
- Maximum 2135 mm (84 in) conveyor length for 487 mm (18 in) and wider conveyors
- Maximum 508 mm (20 in) cleat spacing for 2135 mm (84 in) and longer conveyors

GEARMOTOR MOUNTING PACKAGE & GEARMOTOR SELECTION STEPS

Step 1: Select a **Gearmotor Mounting Package** (below).

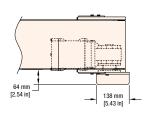

Step 2: Use the Belt Speed Chart (page 17-18) to determine your desired belt speed based on conveyor type and mount

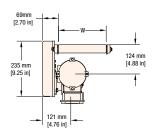

package. See Gearmotor column.

Step 3: Locate the appropriate gearmotor chart (pages 19-20)

Bottom Mount Package, 90° Gearmotor

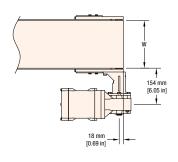

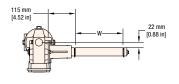

W = Conveyor Belt Width

- Includes stainless steel gearmotor mounting bracket, timing belt, plated pulleys, guard and mounting hardware
- · Conveyor belt speed can be adjusted with optional ratio pulley kits

Side Mount Package, 90° Gearmotor

 \bullet Includes stainless steel gearmotor bracket, coupling and mounting hardware

W = Conveyor Belt Width

90° Gearmotor Location Options

Bottom Mount

Side Mount

Due to the wide variety of drive set ups and applications, point of installation guarding is the responsibility of the end user.

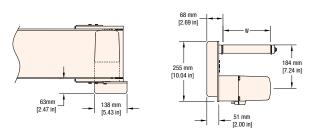

Note: Conveyor and gearmotor are not included in the mounting package and must be ordered separately. Dimensions = in (mm)

Bottom Mount Package, Parallel Gearmotor

W = Conveyor Belt Width

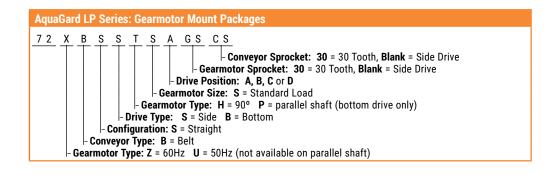

Heavy Duty Sprocket Kit Used in Wet Applications

- Compatible with 90 Degree and Parallel Shaft mounting Packages
- · Stainless Steel #40 Sprockets
- · Stainless Steel/Acetal #40 Chain
- · Belt speeds up to 226 ft/min

This kit becomes part of the gearmotor mounting package when you select your belt speed from the "Chain & Sprocket Package" speed chart (see page 17-18).

Note: Conveyor and gearmotor are not included in the mounting package and must be ordered separately.

Fixed Height Stands

- · Welded open frame Stainless Steel construction with a 2B finish
- Adjustable angle connecting plate from Ø to 60 degrees
- For 70 mm (2.75 in) to 457 mm (18 in) Widths:
- ±100 mm (4 in) of adjustment
- · Optional swivel locking caster
- · Optional diagonal brace for added stability
- For available heights see page 23

STANDARD FEATURE: Fixed Foot

OPTIONAL: Swivel Caster

OPTIONAL: Diagonal Brace

Outriggers

- Fixed height support stands are available with outriggers
- · Outriggers provide added support for tall applications
- · Welded Stainless Steel construction with 2B finish
- Extend stand width 305 mm (12 in)

Dimensions = mm (in)

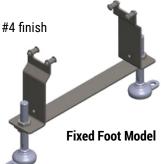

Note: Due to the wide variety of conveyor and stand options along with possible configurations, stability of the final setup is the responsibility of the end user.

Low Height Supports Stands

- · All components are Stainless Steel brushed to #4 finish
- ±51 mm (2 in) of adjustment
- Fixed Foot self-aligns 10° for sloped floors
- · Caster is swivel locking
- · Horizontal conveyor mounts only
- · For available heights see below

Table Top Mounting Brackets

Specifications

- 7 gauge stainless steel, #4 finish
- · Comes with mounting hardware
- · Compatible with industrial aluminum stands
- · Dimensional information see pages 7 and 9

Part Number	531135	Cleated Belts
	531150	Flat Belts

Sanitary Floor Anchor Kits - Type 1

Specifications

- 10 mm (.375 in) x 40 mm (1.57 in) drop in
- · Stainless Steel
- · Anchor is flush with floor upon removal of bolt
- Two (2) per anchor kit

Part Number FAS-1

Sanitary Floor Anchor Kits - Type 2

Specifications

- 10 mm (.375 in) x 70 mm (2.75 in)
- · Stainless Steel
- · Threaded anchor bolt protrudes above floor after installation
- Two (2) per anchor kit

Part Number	EV6-3
I all Mullibel	170-2

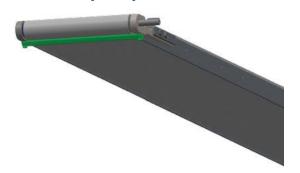

Light Load Side Drive Solution

Specifications

- Compact side drive design
- Suitable for short length and/or light load applications
- 230/460V 3 Phase VFD rated gearmotor
- · Contact factory for options

Bottom Wiper Option

Specifications

- · Wiper can be mounted on either the drive or idler tail.
- · Cleans flat belt from stick on product

Specifications

- Widths: 152 mm (6 in) to 1524 mm (60 in) available in 50 mm (2 in) increments
- Lengths: 610 mm (24 in) to 25375 mm (999 in) available in 25 mm (1 in) increments maximum section lengths of 2997 mm (118 in)
- Tool-less hook design for fast removal and rapid cleaning
- Provides a 50 mm (2 in) window for clean-out access
- · All pans equipped with a 25 mm (1 in) containment lip on all sides
- · Contact factory for additional options and ordering

Dimensions = mm (in)

Note: Due to the wide variety of conveyor and stand options along with possible configurations, stability of the final setup is the responsibility of the end user.

Stainless Steel Carriage Bolts

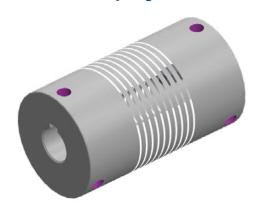

Specifications

- Stainless Steel Carriage bolts
- Kits come in packs of 10
- Support stand brackets uses M8x20mm with flanged hex nuts
- · Stand brace uses M6x30mm with spacer, and nuts
- · Stainless Steel guide block uses M6x30mm hardware

Part Number	Size	Description
531373	M8x20mm	Support Stand
531374	M6x30mm	Stand Brace
531101	M6x30mm	Block Assembly

Side Drive Coupling

Specifications

- · Flexible coupling for gearmotor and conveyor
- · Comes with set screws and replacement keys
- 38mm diameter X 67mm long
- 12mm bore with 4mm keyway

Part Number	807-995
Part Nulliber	007-993

Regulatory Approvals:

Conveyors:

All AquaGard LP Series standard conveyors (not including gearmotors and controllers) are CE approved. CE approval follows the provisions of the following directives; Machine Directive 2006/42/EC, EU Low Voltage Directive 2006/95/EC, and EMC Directive 2004/108/EC. All conveyors are marked with the CE symbol on the Dorner serial number tag located on the conveyor frame. Contact the factory for the CE Declaration of Conformity.

All AquaGard LP Series standard conveyors (not including gearmotors and controllers) are designed and manufactured in accordance with the restrictions defined in the "Restriction of Hazardous Substances" directive, citation 2002/95/EC, commonly known as RoHS. All conveyors are marked with the RoHS symbols on the Dorner serial number tag located on the conveyor frame.

Gearmotors and Controllers:

All AquaGard LP Series gearmotors and controllers carry one or more of the following approvals. Products are not covered by each approval. Please see the appropriate part number on the Gearmotor and controller charts located in this manual. In addition, regulatory symbols are located on the product information tags located on the product.

CE	CE Marking on a product is a manufacturer's declaration that the product complies with the essential requirements of the relevant European health, safety and environmental protection legislation, in practice by the Product Directives. CE Marking on a product ensures the free movement of the product within the European Union (EU).
RoHS	This directive restricts (with exceptions) the use of six hazardous materials in the manufacture of various types of electronic and electrical equipment. It is closely linked with the Waste Electrical and Electronic Equipment Directive (WEEE) 2002/96/EC which sets collection, recycling and recovery targets for electrical goods and is part of a legislative initiative to solve the problem of huge amounts of toxic e-waste.
71	The UL Recognized Component mark is for products intended to be installed in another device, system or end product. This Recognized Component Mark is for the United States only. When a complete product or system containing UL Recognized Components is evaluated, the end-product evaluation process can be streamlined.
c FL [®] us	The UL Recognized Component mark is for products intended to be installed in another device, system or end product. This Recognized Component Mark is for the United States and Canada. When a complete product or system containing UL Recognized Components is evaluated, the end-product evaluation process can be streamlined.
SP ®	CSA International (Canadian Standards Association), is a provider of product testing and certification services for electrical, mechanical, plumbing, gas and a variety of other products. Recognized in the U.S., Canada and around the world, CSA certification marks indicate that a product, process or service has been tested to a Canadian or U.S. standard and it meets the requirements of an applicable CSA standard or another recognized document used as a basis for certification.
c UL us	The UL Listing Mark means UL found that representative product samples met UL's safety requirements. These requirements are primarily based on UL's own published standards for safety. The C-UL-US Mark indicates compliance with both Canadian and U.S. requirements. The products with this type of Mark have been evaluated to Canadian safety requirements and U.S. safety requirements.

Baking Industry Standards and Certifications:

AquaGard LP Series Conveyors are often used in food production or food packaging areas where proper design of equipment is essential to maintain proper food safety. AquaGard LP Series conveyors are designed for light wash down environments typically seen in packaged food, dry food production or confectionary production. In these applications the correct installation and application of the conveyor is critical to the proper running of the conveyor and maintaining proper food safety. The end user must ensure that the conveyor belts are properly tracked and the conveyor is properly installed as defined by Dorner.

All AquaGard LP Series products are designed and constructed to be used in dry food or packaged food production environments. The following AquaGard products have gone through testing and certification and are certified to BISSC standard, design requirements for Conveyors section of ANSI/ASB/Z50.2-2015.

AquaGard LP Series Belted Conveyor

Contact the factory for copy of the certification.

Materials and Chemical Resistance:

Conveyor Frames and Plastics

The following is a list of base materials used in the AquaGard LP Series conveyor:

Material		Conveyor Component
	Acetal Copolymer, POM	Molded bearing housings
	Polyamide, PA	Adjustable Guide Support Brackets
UHMW-PE		Adjustable Guide Face
	Aluminum, anodized (Note: cut ends of aluminum is not anodized)	Conveyor Frame, Support Legs, High Side Guiding, Adjustable Guide Horizontal Post, Adjustable Guide Rail

The materials used in the AquaGard LP Series product can resist many chemicals, however some should be avoided. Avoid the following:

- · Acids with PH less than 4
- · Bases with PH higher than 9

Resistance to Materials: Conveyor Frames and Plastics

The following table provides the resistance to materials used in the conveyor to several chemicals. Application testing is recommended to determine long term material durability.

Legend:

1 = Very good resistance | 2 = Good resistance | 3 = Moderate resistance | 4 = Not recommended | X = no data available

Acids	Acetal POM	Polypropylene	Polyamide PA	UHMW-PE	Aluminum

Bearings and Lubrication:

All bearings on AquaGard LP Series Conveyors are sealed and lubricated for life. No grease zerk is available and no greasing over the life of the product is required.

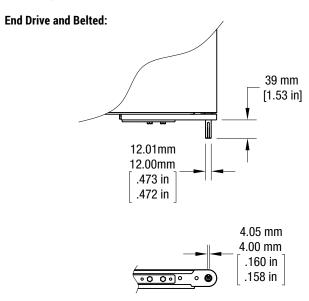

All gearmotors used on AquaGard LP Series conveyor are sealed and may be mounted in any position. Changing gear oil lubrication may be needed over the life of the gearbox. Please check the appropriate gearmotor manual for instructions.

Support Stand Locations:

Support Stand Locations			
Cumhal	Description	Dis	stance
Symbol	Description	mm	in
Α	Maximum distance back at drive end	188	7.4
В	Maximum distance back at idler end	156	6.1
С	3rd stand if center frame joint		

Conveyor Drive Shaft Tolerances:

Note: Dimensions = mm (in)

Conveyor Noise Level (Decibel Ratings)

The actual noise level generated by the conveyor depends on several factors; the installation configuration, the product running on the conveyor, the surrounding equipment, the conveyor options and belt speed. The noise level generated by the conveyor is typically less than the general noise level of factory equipment.

Generally a higher belt speed will result in a higher noise level. The following charts provide basic decibel ratings for a typical conveyor arrangements.

Belted Conveyors:

Maximum Load Capacity

The following Load Capacity Charts **do not** take into account the conveyor configuration, length or gearmotor selection. Your specific conveyor may not be capable of the maximum load condition. Please confirm your maximum load per application with the Dorner DTools program at www.dornerconveyors.com.

All load capacities shown are non-accumulated evenly distributed loads.

AquaGard I	AquaGard LP Series Belted End Drive Conveyor				
Belt \	Width	Pulling	the Belt	Pushing	the Belt
mm	in	Kg	Lb	Kg	Lb
70	(2.75)	14	31	7	15
95	(3.75)	16	35	8	18
152	(6)	18	40	9	20
203	(8)	23	51	12	26
254	(10)	27	60	14	31
305	(12)	27	60	14	31
406	(16)	27	60	14	31
457	(18)	27	60	14	31

No Load Torque:

No load torque is the amount of torque required to turn an empty conveyor. The torque value varies by conveyor length and configuration. The following charts provide basic values for an average length conveyor. Your specific conveyor may not be have a higher value. Please confirm your no load torque and maximum load per application with the Dorner DTools program at www.dornerconveyors.com.

Belted Conveyor No Load Torque		
Belt Width mm (in)	Belted End Drive Nm (in-lbs)	
70 (2.75)	0.6 (5)	
95 (3.75)	0.7 (6)	
152 (6)	0.9 (8)	
203 (8)	1.1 (10)	
254 (10)	1.4 (12)	
305 (12)	1.6 (14)	
406 (16)	1.8 (16)	
457 (18)	1.9 (17)	

Belting and Coefficient of Friction

The coefficient of friction is used to determine the load a conveyor can carry. It effects a conveyor in two ways: the friction that exists between the conveyor belt and the bed surface, and if accumulating product, the friction that exists between the conveyor top surface and the product.

Coefficient of Friction, between the bottom of the conveyor belt and bed surface:

Product	Surfaces	Application Condition	Coefficient of Friction
AquaGard LP Series Belted	Impregnated polyester fabric to anodized aluminum bed plate	Dry	0.33

Coefficient of Friction, between the top surface of conveyor belt and product:

AquaGard LP Series Beit		AquaGard LP Series Belt				
The following table provides the coefficient of friction between steel product and various belt top surfaces. All factors below are assuming dry conditions.						
Belt Number	Top Surface Material and Type	Coefficient of Friction				
01, 54, 58, 68, 73, 81	, 58, 68, 73, 81 Smooth hard urethane 0.40					
02, 59, 60, 61, 66, 72, 76, 79	Smooth medium urethane	0.50				
03, 19, 55, 69, 75, 77, 78, 80	03, 19, 55, 69, 75, 77, 78, 80 Glossy soft urethane >1.0, do not accumulate					
05, 06, 50, 53, 63 Impregnated polyester fabric 0.20						
08, 18, 64	PVC, Very High friction	>1.0, do not accumulate				

Calculating Conveyor Load Capacity

There are several factor that effect the overall conveyor load of AquaGard LP Series Conveyor. These include:

- · Conveyor size and configuration
- · Conveyor speed
- · Application temperature
- Product accumulation
- Number of starts and stops per hour

Located online at www.dornerconveyors.com is the Dorner conveyor configuration tool, DTools. This tool allows you to configure your conveyor layout and determine the maximum load capacity for the conveyor. It is suggested that this program be used to calculate the conveyor load as the calculation is quite complicated. This configuration program however does not take into account temperature, dirty conditions, and conveyor starts and stops. If these conditions are part of your application please use the load reducing factors as shown below.

Start / Stop Factor

Maximum Load = (Load from DTools)(Temperature Factor)(Start/Stop Factor)

Temperature Factor				
Ambient temperature can negatively affect the capacity of the conveyor.				
Temperature F	Temperature C	Temperature Factor		
-4	-20	1.0		
32	0	1.0		
68	20	1.0		
104	40	0.9		
140	60	0.8		

Frequent Start / Stops of the conveyor can negatively affect the capacity of the conveyor. All start / stop applications must use a soft start mechanism such as a Frequency Inverter with a 1 second acceleration cycle.	
Application Condition	Start / Stop Factor
Continuous Run or 1 start/stop per hour	1.0
Maximum 10 starts/stop per hour	0.83
Maximum 30 starts/stop per hour	0.70
Greater than 30 starts/stop per hour	0.62

Calculating Conveyor Belt Speed:

AquaGard LP Series Conveyors:

To calculate the conveyor belt speed you need to know the following factors:

DR = Drive roller diameter or drive sprocket pitch diameter (mm)

= 31.75 mm (1.25 in) for end drive belted conveyors

TG = Number of teeth of pulley located at gearmotor (if equipped)

TD = Number of teeth of pulley located at drive roller (if equipped)

RPM = Revolutions per minute of gearmotor

Belt Speed (m/min) = RPM*(TG/TD)*(DR/1000)*3.14

Example:

AquaGard LP Series Belted End Drive, bottom mount with a 32 tooth pulley located at the drive roller and a 22 tooth pulley located on the gearmotor. The gearmotor is a 10:1 ratio with 172 rpm output.

Belt Speed (m/min) = (172)*(32/22)*(31.75/1000)*3.14

Belt speed (m/min) = 25 m/min

Belt speed (ft/min) = 25 m/min*(3.28) = 82 ft/min

Dorner AquaGard Conveyors are Best for:

Baking

- Secondary Packaging
- Packaged Foods
- Snack Foods

 Elevation Changes And More!

Confectionary

Pet Foods

Tight Transfers

AquaGard LP Series Specifications*

- Belted and Cleated Belt Models
- Loads up to 22.7 kg (50 lbs)
- Widths: 70 mm (2.75 in) to 457 mm (18 in)
- Lengths: 500 mm (19.1 in) to 8,485 mm (18 ft)
- · Robust welded 304 Stainless Steel frame
- · Available in straights only

7350 Series Specifications

- · Belted, Cleated Belt, Modular Belt, Modular Cleated Belt Models and Positive Drive Options
- Loads up to 341 kg (750 lbs)
- Widths: 152 mm (6 in) to 914 mm (36 in)
- Lengths: 914 mm (3 ft) to 25,000 mm (82 ft)
- · FDA approved belting and plastic components
- 304 Stainless Steel frame

Straights

Curves (Modular Belt Only)

LPZ (Z-Frames), Nose Over & Horizontal to Incline

Options

Nose Bar Transfers

Powered Transfers

Variety of Guiding Options

Other options available including Roller Transfers, Chutes, Drip Pans, Formed Angle Stands, Hoppers and more.

^{*}Please refer to the AquaGard 7350 Series manual for product information.

Industrial

Pallet Systems

Engineered Solutions Group

Custom engineered solutions for almost any application.

Flexible Chain

Sanitary Stainless Steel

CAD Configurator Tool

Industry leading tool! Configure your own custom conveyor in minutes.
